## SUMMARY

Python full-stack web developer with a passion for creating visually appealing, user-friendly digital experiences. Knowledgeable in HTML/CSS/JS, and Python frameworks like Django .Committed to continuous learning and adept at quickly adapting to new technologies.

---

## EXPERIENCE&INTERNSHIP

**Software Developer:July 17, 2024 - Aug 17, 2024**

**ExtraMindTech**

- APIs section for a trading application: Developed and implemented APIs for a trading application, which helped to handle data efficiently and make secure transactions.
- Demonstrated technical knowledge and professionalism: Sincere, hardworking, and enthusiasm contribute to positive contribution in the team environment.
- Exhibited excellent character and conduct: Maintained professional behavior, showing a positive attitude and strong work ethic.

**Synnefo Solutions :Nov 07,2023 - Dec 07,2023**

six-month course and one-month internship in full-stack Python Web development During this time, I gained experience working with front-end languages such HTML, CSS, and Bootstrap, as well as backend technologies including Python and Django.

---

## PROJECT

**The GMRL laboratory** - is a web application with an interactive and user-friendly interface built with HTML, CSS,Bootstrap and JavaScript on the front end. On the back end, the project manages the application's logic, database with Python and the Django framework. The GMRL laboratory project provides a seamless and responsive experience for users to access and interact with laboratory data and functions by combining these technologies.

### **Asset-Sync — Asset Management System Software**

Developed a comprehensive asset management system designed to streamline IT teams' processes for tracking and managing company assets. The system provides a centralized platform where IT professionals can efficiently organize, monitor, and audit hardware and software assets.
